

1 ACLS SQL 9.3.x - Bug Fixes & New Features
2
3 1. Resource Manager
4 - Added a resource setting to enable reminders by default, so users no longer
need to tick the reminder checkbox when making bookings. Reminder emails will
now be sent automatically.
5
6 2. Enterprise Service
7 - Added a "Book Now" button for direct access to the selected resource's booking
calendar, improving usability and productivity.
8
9 3. MoxyTap + Tracker
10 - Fixed the issue where the MoxyTap unit and tracker configuration remained
active when the tracker was turned off. This now ensures the MoxyTap unit is
automatically disabled without requiring manual action by administrators.
11
12 4. General Bug Fixes
13 - User Profile Manager: Fixed an error triggered when searching by user code
using letters.
14 - Supervisor Manager: Resolved missing school names in supervisor search results.
15 - Resource Manager: Fixed an error occurring when cloning a resource with
customisation fields enabled.
16 - Online Registration (Auto-Approval): Corrected the issue where default user
group allocation did not apply upon registration approval.
17 - Pre-Approval Bookings: Updated the timeline calendar logic to correctly
support pre-approval booking workflows. The previous script incorrectly handled
all bookings as operational bookings.
18
19 5. UWA Customisations
20 - Changed research repository catalogue access permissions from Admin Category
Group to Equipment Supervisor Group.
21
22 6. Research Resource Repository Enhancements:
23 - Added support for selecting multiple research techniques.
24 - Added "Portfolio Type" with three categories—Facility, Equipment,
Component—with Equipment as the default.
25
26 7. AIIM Customisations
27 - Finance report: Fixed staff name display issues for operational booking types.
28
29 8. MCN Customisations
30 - Added resource and charge category information to the closed consumable job
report.
31 - Added total consumable charges across all consumable reports.
32
33 9. AMR Customisations
34 - Enabled BOS integration.
35
