

ACLS SQL v9.6.x — Release Notes

Bug Fixes, Enhancements & New Features

ACLS v9.6 introduces significant improvements across reporting, resource management, integrations, and client-specific deployments. This release focuses on strengthening operational reliability while expanding platform capabilities for advanced research infrastructure environments.

New Features & Enhancements

1. MoxyTap Activity Reporting

- Fully overhauled the **Tap-to-Sign-In and Sign-Out report**.
- Improved data visibility and reporting accuracy for facility access and equipment usage.

2. Consulting Service Module

- Implemented **ACLS-PLUS calendar integration** to support consultant scheduling.
- Enables structured calendar management for consulting services.
- Currently available for the **UNSW deployment**, with broader rollout planned.

3. User Profile Manager

- Added **Access Group** information to search results for improved administrative visibility.
- Corrected **school naming** within multi-tier organisational structures to ensure data consistency.

4. Resource Manager

- Introduced **Permanent Resource ID** and **Permanent Resource Group ID** to enhance long-term data traceability.
 - Added reporting capability for both identifiers to support auditing and system governance.
-

Client-Specific Customisations

5. AMR Deployment

- Enhanced **BOS access controls** in line with AMR operational requirements.

6. NIF Deployment

- Added **specialised data fields** tailored to NIF workflows and reporting needs.

7. AARHUS Deployment

- Resolved an **invoice calculation bug** impacting business-hour computations when bookings occurred entirely outside defined business hours.
- Improves billing accuracy and financial compliance.

8. RIMS Deployment

- Updated **CBI module email templates** for improved communication clarity.
- Fixed refresh issues affecting the **researcher list**.
- Added new contacts to the **user registration notification template**.

Release Focus

This version prioritises:

- Greater billing accuracy
- Stronger reporting capabilities
- Improved governance through permanent identifiers
- Expanded calendar integrations
- Targeted enterprise client enhancements
