ACLS SQL 9.2.x – Bug Fixes & New Features

1.   Supervisor Sign-In
     + Enhanced supervisor sign-in functionality to provide direct access to their
       supervised researcher group, including:
          - Researcher group profiles
          - Booking reports for the group
          - Invoices for the group
2. Booking Dashboard
     - Improved tracker and Tap & Go status user interface for clearer visibility.
3. Tracker
     - Optimised live status tracking scripts for improved accuracy and reliability.
4. Calendars
     + Added filters to properly handle extended ASCII codes in:
          - Customised booking fields
          - Booking notes fields
5. User Registration
     - Improved auto-approval functionality to reduce administrator workload.
6. MoxyTap Integration
     - Added automatic sign-out timer feature.
     - Enhanced MoxyTap Manager user interface.
7. Mobile App
     - Fixed booking permission issue affecting lab spaces enabled for groups of
       resources.
8. AIIM Customisations
     + Implemented customisations as per proposal, including:
          - Operation calendar
          - Commercial calendar
          - Service calendar
          - AIIM finance report
9. NIF Customisations
     - Booking reports: added participant study id
10.Database Compliance
     - Completed compliance upgrades for PostgreSQL v16.9.
