

MOXY cast.

Display what matters

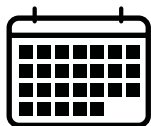

collaborate
broadcast
share

Moxycast isn't just a screen display tool, it brings people together and creates a digital campus.

This facilitates quicker information sharing within a connected team.

Control your screens from anywhere at anytime.

live calendars

market leading
design

global communication
between labs

live desktop
anytime

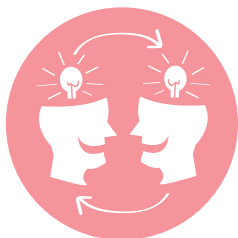

This program is currently being trialled by the Mark Wainwright Analytical Centre, UNSW Sydney, the Research School of Biology, ANU, the Faculty of Science, UTS, and the Institute for Frontier Materials, GTP Research, Deakin University.

MOXY^{cast.}

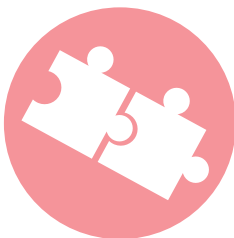

secure. stable. easy

Bringing innovative, market leading design to your lab, work group or team.

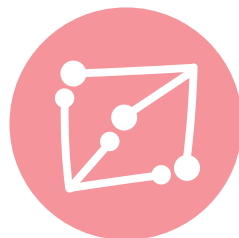

Broadcast to any screen anywhere in the world.

collaborate

integrate with other software

seamless connectivity

Data encrypted in transition

secure cloud storage

no loss in display quality
